There are more than 8 billion people in the world and each and every one of us is authentic.

However, we are all interconnected.

In its nucleus, every creature shares the same nature's principles, elements and bonds.

Chemistry is in our core and chemistry is all around us.

No matter who you are at your own fundament, we have at least one thing in common...something profound that connects us...

CHEMISTRY CONNECTS US

For the coming generations

"The best thing about working with like-minded enthusiasts is that you can implement your personal values into everything you do.

We are passionate about each project and observe each task from our own unique perspective to be able to deliver results with agility and highest professional standards."

Miloš Ivošević,
Mechanical
Engineer, PhD

Who are we?

We are a team of highly skilled, focused and motivated enthusiasts passionate about improving quality of life for the coming generations.

While delivering best-in-class process and chemical engineering solutions, we maintain the highest level of integrity, agility and accountability.

We are located in Belgrade, Serbia, but driven by international projects and collaborations.

**Who we are drives
the way we work**

Basic company information

Year of establishment: **2016.**

Location: **Serbia, Belgrade**

TIN: **112690991**

Registration number: **66287432**

"Wer vor der Vergangenheit die Augen verschließt, wird blind für die Gegenwart."

Our core competencies

Water treatment

- Purification for domestic use
- Treatment for specialized industrial applications
- Treatment of wastewater

Piping engineering

- Piping design
- Pipe stress analysis
- Hydraulic design

Process equipment

- Equipment design
- Documentation

Project management

- Scope and time management
- Cost management
- Quality management
- Human resources planning

Our services

"Unser wichtigstes anliegen ist es, auf die individuellen interessen und bedürfnisse unserer kunden einzugehen."

Design of unit operations

- Fluid flow
- Heat transfer equipment
- Mass transfer equipment
- Thermodynamic processes
- Mechanical processes

Engineering - economic analysis

- Cost evaluation
- Budgeting
- Plant optimization

Software for engineering purposes

- Design and development of custom-made software solution
- Testing
- Maintenance

Innovation Lab / R&D

- Technology development
- Data analysis

What guides us?

Mission

We deliver high quality process engineering solutions that are meant to enhance **quality of life** and keep our **environment healthy** for **the coming generations**.

Vision

We are **reliable partner** of choice for leading **global chemicals manufacturers** in achieving more **effective, innovative and sustainable ways** of producing safe, qualitative and novel products **for everyone**.

How do we work?

We take pride in working in a **Helmchron way** with:

Integrity

- We show **respect**
- We take **responsibility**
- We **stand up** for what is **right**
- We express **gratitude** and give **credit**

Commitment

- We keep our **promises** and give promises we can keep
- We give **our best**
- We are **loyal**

Agility

- We are open to **change**
- We respond **efficiently** to our partners` needs

Diversity

- We **empower** each other and value our **differences**

Courage

- We take **initiative**
- We step **out** of our **comfort zone**

Our team

Miloš Ivošević,
Mechanical
engineer, PhD,
CEO

Milos Ivosevic is the founder of the company and creator of the vision. Enthusiastic and entrepreneurial, Milos was always focused on extensive international projects that contribute to improving the quality of life for the coming generations.

The high point of his university period was the experience he gained at the well known Paul Scherrer Institut (PSI) in Switzerland. While studying, he was, also, hands-on involved in multiple engineering projects in Serbia and Croatia.

During the last 10 years, Milos worked as part of various multinational teams and did projects for the leading chemical and pharmaceutical innovators (BASF, Novartis, Roche etc.).

He did his Masters and Phd thesis at the University of Belgrade, Faculty of Mechanical engineering.

Anja Andjelković,
Mechanical
engineer, MSc,
Projects Lead

Anja Andjelković has joined the team in 2020. bringing additional focus to our operations and expansion. Her comprehensive skill set, knowledge and motivation has brought a new perspective and strengthened the outcomes we deliver to our partners. As a projects` lead, she coaches our team of projects` associates and is in charge of seamless execution.

Anja used to play volleyball professionally and her discipline is one of the most valuable assets of our team. She holds a Masters degree in Mechanical Engineering from the University of Belgrade.

We have at least one thing in common...
